

How to participate

1. You have an idea?

Develop innovative concepts and solutions for current application problems with respect to space.

2. Choose your prize

Take a look at our different prizes and find the one that best suits the focus of your project, as well as its innovativeness and maturity. www.innospace-masters.de/prizes

3. Get registered and submit your idea

Seize your chance and become the next INNOspace Master! Register now on our secure online database and send us your innovative idea on "Space Moves!"!

THE CHALLENGE

The INNOspace Masters is being organised by the Space Administration of the German Aerospace Center (DLR) as an embedded component of the INNOspace® initiative. AZO Anwendungszentrum GmbH Oberpfaffenhofen, an international networking company for space related innovation competitions, has been implementing the competition since 2015 on behalf of DLR. Partners of the competition are Airbus, OHB and the German ESA Business Incubation Centres (BICs).

Following the emergence of the New Space Economy, the fusion of different disciplines and sectors of industry is offering more and more potential for successful innovations. Under the motto "Space Moves!", ideas and concepts with different degrees of innovation and maturity will be sought for the various categories of the competition until 8 February 2019. The focus will be on cross-industry technology transfer in the form of both spin-offs and spin-ins, new business models, and other innovative concepts with a connection to the aerospace industry. Ideas can be submitted from virtually any area, including mobility, propulsion technology, materials, components, communication, networking, sensors, or miniaturisation.

PRIZE CATEGORIES

Select the prize that suits you best in maturity and topic:

Business Models for User Needs

Pre-competition phase
 Research, development, demonstrators

Target group:
 Companies (especially SMEs), universities, and non-university research institutions

Initial phase
 Proof of market, near-to-market prototypes

Target group:
 SMEs, startups, research teams, students

Innovation and integration phase
 Technologies, systems, services & solutions

Target group:
 Science and industry, startups and individualists

Utilisation & Application Phase
