

# How to participate

## 1. You have an idea?

Develop innovative concepts and solutions for current problems with respect to space.

## 2. Choose your Challenge

Take a look at our different challenges and find the one that best suits the focus of your project, as well as its innovativeness and maturity. [www.innospace-masters.com/challenges](http://www.innospace-masters.com/challenges)

## 3. Get registered and submit your idea

Take your chance and become the next INNOspace Master! Register now on our secure online database and send us your innovative idea on "Space Moves!"!

## The 5<sup>th</sup> INNOspace Masters Round

The INNOspace Masters is being hosted by the Space Administration of the German Aerospace Center (DLR) as an embedded component of the INNOspace® initiative. AZO Anwendungszentrum GmbH Oberpfaffenhofen, an international networking company for space related innovation competitions, has been implementing the competition since 2015 on behalf of DLR. Partners of the competition are Airbus, OHB, DB Netz AG and the German ESA Business Incubation Centres (BICs).

Following the emergence of the New Space Economy, the fusion of different disciplines and sectors of industry is offering more and more potential for successful innovations. Under the motto "Space Moves!", ideas and concepts with different degrees of innovation and maturity will be sought for the various challenges of the competition until 7 February 2020. The focus will be on cross-industry technology transfer in the form of both spin-offs and spin-ins, new business models, and other innovative concepts with a connection to the aerospace industry. Ideas can be submitted from virtually any area, including propulsion technology, materials, components, sensors, cost reduction or biomedical sciences.

Business Models for User Needs

Space Administration

**Pre-market phase**  
 Research, development, demonstrators

**Target group:**  
 Companies (especially SMEs), universities, and non-university research institutions

**Initial phase**  
 Proof of market, near-to-market prototypes

**Target group:**  
 SMEs, startups, research teams, students

**Innovation and integration phase**  
 Technologies, systems, services & solutions

**Target group:**  
 Science and industry, startups, SMEs and individuals

Utilisation & Application Phase

## CHALLENGES

Select the Challenge that suits you best in maturity and topic:
