

# Sustainable and Efficient Innovations for Space and Earth

## CHALLENGE BY THE GERMAN SPACE AGENCY AT DLR

The aerospace industry is in transition. Both spin-ins and spin-offs, the transfer of technology and know-how from other sectors into the aerospace industry and vice versa, offer great opportunities for innovation.

The DLR Challenge focusses on technology developments **prior to commercialisation**. Especially, we're looking for cross-industry cooperation projects. So **team up with partners from other industries** and submit your idea!

## THE CHALLENGE

The German Space Agency at DLR is looking for innovative ideas and concepts leading to improved technologies, processes, and applications by transferring expertise between space and other sectors. This year's DLR Challenge focuses on:

- › Digital Sustainability and Security in Space (e. g. cyber-security, quantum communication, space weather resistance, protection from GNSS spoofing/jamming, ...)
- › Sustainable, safe and efficient Energy Supply and Mobility focused on the Transfer of Hydrogen Technologies (e. g. e-fuels, hydrogen processing & storage, shared infrastructure, ...)

The ideas can reach from basic applied research up to technology demonstrators.

## THE PRIZE

Do you work for a company, in particular an SME, a university, or a non-university research institution? If so, we encourage you to enter the DLR Challenge.

- › Verifiable applications involving individual or joint proposals are eligible for funding from Germany's national space and innovation programme
- › Up to EUR 400,000 in possible funding for each project. This funding is subject to the general funding guidelines of the German Federal Government

## THE PARTNER

Acting on behalf of the Federal Government, the German Space Agency at DLR designs and implements Germany's Space Programme, which integrates all German space activities on the national and European level.

The German Space Agency at DLR has started the initiative INNOspace® to promote innovations, technology transfer and new markets.
